ARALDITE 2014 A/B epoxy adhesive is well suited for bonding electronic components, GRP structures, and other parts that may be exposed to elevated temperatures and/or aggressive environments.

---

### Applications

ARALDITE 2014 A/B epoxy adhesive is suitable for bonding:

Metals  
Ceramics  
GRP  
Electronic components

---

### Advantages

Heat resistant to 248°F (120°C)  
Withstands exposure to water and a wide variety of chemicals  
Gap-filling, non-sagging up to 0.2 inch (5 mm) thickness  
Bonds well to a wide variety of substrates

## Processing

### Application of Adhesive

The resin/hardener mix is applied with a spatula to the pretreated and dry joint surfaces.

A layer of adhesive 0.002 to 0.004-inches (0.05 to 0.10-mm) thick will normally impart the greatest lap shear strength to a joint.

The joint components should be assembled and clamped as soon as the adhesive has been applied. Even contact throughout suffices to ensure proper cure.

### Standard Test Specimens

Unless otherwise stated, the figures given below were all determined by testing standard specimens made up by lap-jointing 4-inch x 1-inch x 0.06-inch (10-cm x 2.5-cm x 1.5-mm) strips of aluminum. The joint area was 0.5 x 1 inch (12.5 mm x 2.5 cm) in each case.
